Section 1 - Prompt

Create a one page HTML professional resume using the following details:

Name: Miguel Nathan S. Bartolata
Email: mnsbartolata@gmail.com
Phone: 09171553487

Education:
Preschool: Ateneo de Davao University - Matina /// 2009 - 2011
Grade School: Ateneo de Davao University - Matina /// 2012 - 2017
High School: Ateneo de Davao University - Matina /// 2018 - 2021
Senior High School: Ateneo de Davao University - Bangkal /// 2022 - 2023 (Pre-CS Strand)
College: Ateneo de Davao University - Roxas /// 2024 - Present (CS Cluster - BSIT)

Skills: HTML, CSS, JavaScript, Python, MySQL, C#, Java, Visual Studio, VS Code

Projects/Experience:
Game Tracker - HTML, CSS, Javascript
Snakes and Ladders - HTML, CSS, React
Student Information System (in progress) - HTML, CSS, Javascript, Python, MySQL
Cashier Transaction System (in progress) - C#/Visual Studio, MySQL

Use a clean, modern format with clear section headings that's easy to look at for the eyes, especially at night time. Keep it concise and suitable for entry-level job applications.

Section 2 – LLM Outputs

ChatGPT:

Education

College
Ateneo de Davao University - Roxas (2024 - Present)
CS Cluster - BSIT

Senior High School
Ateneo de Davao University - Bangkal (2022 - 2023)
Pre-CS Strand

High School
Ateneo de Davao University - Matina (2018 - 2021)

Grade School
Ateneo de Davao University - Matina (2012 - 2017)

Preschool
Ateneo de Davao University - Matina (2009 - 2011)

Skills

HTML5 | CSS3 | JavaScript | Python | MySQL
C# | Java | Visual Studio | VS Code

Projects & Experience

- **Game Tracker** – HTML, CSS, JavaScript
- **Snakes and Ladders** – HTML, CSS, React
- **Student Information System (In Progress)** – HTML, CSS, JavaScript, Python, MySQL
- **Cashier Transaction System (In Progress)** – C#, Visual Studio, MySQL

Deepseek:

Miguel Nathan S. Bartolata

BSIT · CS Cluster

mnsbartolata@gmail.com
0917 155 3487

Education

College · BS Information Technology — 2024 – Present
Ateneo de Davao University - Roxas
CS Cluster · Focus on software development, databases, and full-stack fundamentals.

Senior High School · Pre-CS Strand — 2022 – 2023
Ateneo de Davao University - Bangkal
Pre-Computing Studies track, foundation in programming logic.

High School — 2018 – 2021
Ateneo de Davao University - Matina

Grade School — 2012 – 2017
Ateneo de Davao University - Matina

Preschool — 2009 – 2011
Ateneo de Davao University - Matina

Technical Skills

HTML5 · CSS3 · JavaScript · Python · MySQL · C# · Java · Visual Studio · VS Code · React (basic) · Relational DB · Git basics

Projects & Experience

Game Tracker — HTML5 · CSS3 · JavaScript
Interactive dashboard to track game sessions, scores, and player stats. Implemented dynamic UI updates and local storage for persistence. Demonstrates DOM manipulation and responsive design.

Snakes and Ladders — React · CSS3 · JavaScript
Classic board game built with React hooks, state management, and custom animations. Two-player mode with dice rolling logic and win conditions. Component-based architecture.

Student Information System — In progress
Python · MySQL · JS
Full-stack enrollment & records management system. Backend with Python/Flask, MySQL database, and frontend with vanilla HTML/CSS/JS. Implements CRUD operations and user authentication.

Cashier Transaction System — In progress
C# / Visual Studio · MySQL
Desktop application for point-of-sale workflows: product catalog, cart management, receipts, and transaction logs. Built with WinForms, ADO.NET, and local MySQL server.

Section 3 – Comparison Table

Criteria	LLM 1: ChatGPT	LLM 2: DeepSeek
Structure	Simple, topdown layout	Effective use of space
Clarity	Easy to scan right off the bat	Detailed and dense but still easy to follow
Formatting	Too plain-looking / looks incomplete	Better visual separators and grouping of elements
Overall Quality	Good as a template, not a portfolio	Ready to use with some minor touch-ups

Section 4 – Reflection

Which LLM performed better and why?
Deepseek performed better because it understood what my prompt wanted a lot better than ChatGPT did for their first tries. It matched my desired output and followed the instructions that I detailed in the prompt.

What differences did you observe?
The layout and how the elements were grouped together are some of the key differences that I've observed. For ChatGPT, it just uses the basic top-down layout and flexbox settings for the skills section, making the negative space glaringly obvious. Meanwhile, Deepseek has the content divided into 2 columns and positioned the elements in a way that the space in the container is maximized as much as possible, fitting the page content in a neat and orderly manner.

What improvements did you make in your final resume?
I added devicons for the skills section and rewrote the project's descriptions to be more accurate to what it actually is and what I did for the project. For the most part, it's the same output from DeepSeek as it already had everything I needed from the get-go.

What did you learn about prompting?
Different LLMs can have subtle differences in how they interpret prompts. The same prompt will not spit out the exact same output if you paste it into different LLMs. As a matter of fact, the same prompt will not give the exact same output on the same LLM if it was inputted in a different time or chat. This is important to note if you ever want an LLM to make revisions without affecting anything else not related to what you want to be revised.

Section 5 – Final Resume

Miguel Nathan S. Bartolata

BSIT · CS Cluster

Education

College · BS Information Technology — 2024 – Present
Ateneo de Davao University - Roxas
CS Cluster · Focus on software development, databases, and full-stack fundamentals.

Senior High School · Pre-CS Strand — 2022 – 2023
Ateneo de Davao University - Bangkal
Pre-Computer Studies track, foundation in programming logic.

High School — 2018 – 2021
Ateneo de Davao University - Matina

Grade School — 2012 – 2017
Ateneo de Davao University - Matina

Preschool — 2009 – 2011
Ateneo de Davao University - Matina

Technical Skills

HTML5 · CSS3 · JavaScript · Python · MySQL · C# · Java · Visual Studio · VS Code · React (basic) · Relational DB · Git basics

Projects & Experience

Game Tracker — HTML · CSS · JavaScript
Interactive dashboard to track self-made game tasks/goals for video games that you are currently playing. Demonstrates DOM manipulation and responsive design.

Snakes and Ladders — React · CSS · JavaScript
Classic board game built with React hooks and state management. Player versus bot mode with dice rolling logic and win conditions.

Student Information System — In progress
Python · MySQL · HTML · CSS · JS
Full-stack enrollment & records management system. Backend with Python/CGI, MySQL, and frontend with HTML/CSS/JS. Implements CRUD operations and user authentication as well as sentiment and zero shot pipeline for automatic categorizing of student evaluations.

Cashier Transaction System — In progress
C# / Visual Studio · MySQL
Desktop application for point-of-sale workflows: product catalog, cart management, receipts, and transaction logs. Built with WinForms, .NET, and local MySQL server.

Active developer · Ateneo CS Cluster
Collaborative projects, version control, agile fundamentals

Open for entry-level opportunities · IT student passionate about full-stack development & databases
